In trigonometry, the law of cosines (also known as the cosine formula, cosine rule, or al-Kashi's theorem) relates the lengths of the sides of a triangle to the cosine of one of its angles. Using notation as in Fig. 1, the law of cosines states $c^2 = a^2 + b^2 - 2ab \cos C$, where C denotes the angle contained between sides of lengths a and b and opposite the side of length c .
